

EXHIBIT "B"

DESCRIPTION OF OFFICERS

Campus Communications Group, Inc.
List of officers

Edward E. Bridges, Chairman – Mr. Bridges brings ten (10) years of direct telecommunications experience and over 30 years of management, marketing, and finance experience, including over \$1 billion in projects. He was founder and CEO of TelaLink Network, Ltd.

G. Scott Brodey, Chief Executive Officer – See Attached Resume

Charles E. Moore, Jr., President – Mr. Moore has over 27 years of experience with Bell Atlantic where he held numerous positions in the areas of strategic planning, international and domestic financial management, accounting, human resources, regulatory affairs and public relations. He served as Chief Financial Officer and Vice President of Finance for a number of Bell Atlantic business units.

James R. Crabtree, Vice President – Mr. Crabtree has over 30 years of direct rural telephone company management experience in telecommunications and information systems. Mr. Crabtree has successfully managed a Century Telephone Company operating region consisting of over 147,000 wireline access lines and 120,000 wireless customers. He has also increased regional sales over 100% and managed a \$23 MM capital construction budget and a \$42 MM operating budget, with expended rates below budget at 95%.

G. SCOTT BRODEY

Teeger Marscot Inc. (1990-Present)

Founded consulting firm specializing in all facets of the Competitive Local Exchange Carrier (CLEC) Industry from Marketing Feasibility Studies through the actual Construction and Operation of CLECs including Acquisitions.

Consultant /*President/CEO, Intetech, L.C., Second Quarter, 2000-2002

Contracted by Integroup Realty Trust (IRT), backed by Prudential Investments, as a consultant to determine the feasibility of the concept behind Intetech L.C., a small CLEC controlled by IRT and serving the Multiple Dwelling Unit (MDU) markets. Three months after making a positive determination, developing a business plan and building a management team, *IRT requested that I assume the President/CEO role and locate a buyer for the company. This was done and the new owners, Campus Communications Group, requested that I stay on as CEO.

Consultant to Stanford Research Institute (SRI), First Quarter, 2000

Contacted by SRI and requested to assist with an assignment involving a nationwide review for a new national and international provider of broadband and clearinghouse services. I was asked to help the client gain additional understanding of its potential customers, mainly ISPS, ASPs, CLECs, and IXCs, and determine the viability of the potential revenue goals. The finished product included: a customer segmentation scheme that reflects end-user demand for client's product offering and other attitudinal data such as service needs and business strategies. In addition, an automated revenue model to predict revenue levels by market segment for fiscal year 2000 and beyond was provided.

Consultant /*Chairman and CEO, P V Tel. Inc., (1999)

Consulted to a small CLEC in eastern Tennessee to help refinance and grow beyond present footprint. *Became CEO and brought \$1.35 million equity into the company. Raised \$16MM in debt and equity and moved the company forward. Founders and investors could not agree on dilution percentages and the company was sold to Avana Communications in Atlanta.

Consultant /* Senior Vice President, LOGIX Communications, (1998-1999)

Recruited by senior management to assist a newly formed CLEC in Oklahoma with a \$340MM senior debt placement, integration of three acquisitions totaling over \$150MM. After initial contract, COO requested that I stay on as Senior Vice President, Operations overseeing the manning and build out of seven cities in Oklahoma and Texas, including the installation and turn up of seven large Nortel Class #5 switches.

Consultant /* Executive Vice President, KMC Telecom, (1995-1997)

Contracted as a consultant at the beginning of 1995 to explore the CAP/ CLEC marketplace in the second and third tier cities for a new start company, KMC. Successfully secured the first franchise for Huntsville, AL in less than ninety

days. By outsourcing all functions and directly managing all aspects of the project, was able to complete construction through operational status in less than six months, delivering a fifty two mile SONET FIBER OPTIC RING. During the next eighteen months, five additional cities were successfully completed and a new company, KMC Holding Company, was established as a viable entity in the CLEC industry. *After the first year of consulting and at the request of the chairman and initial investors I accepted a full time position for one year as EVP, to assist in additional financing and build out. This position came with a huge sign-on and equity position with the new company. At the end of the second year with the senior management team in place, over \$50MM of equity and debt secured, I resigned to return home to Florida and continue my consulting practice.
